

Abey^{AU}
CREATING POSSIBILITIES

**Gareth Ashton
Bathroom Collection**

Abey Australia are both creators and innovators, drawing on our heritage as leaders in business and aficionados of design.

Over the past 67 years we have established a diverse portfolio of premium products with global brand partners who share our vision for innovation and remarkable design.

Together we empower you to push the limits of creativity and design in the kitchen, bathroom and laundry.

Our expert and efficient service, and shared passion for inspired design empowers our clients to create new design possibility.

Abey Australia —the premier destination for quality designer products that are the genesis of new design possibility.

Abey Australia — Creating possibilities.

pop up waste.

Supplied with White Plug & Waste

Poco Oval Countertop Basin

123391

Overall size 490 x 395 x 150mm

Supplied with White Plug & Waste

Poco Countertop Basin

123130*

Overall size 460 x 425 x 105mm

Supplied with chrome pop up
waste

Supplied with White Plug & Waste

304 Stainless Steel

Bring modern metallics into your bathroom with our 304 Stainless Steel Basin range.

304 Stainless Steel Basin BAPRND
Vela High Basin Mixer 7B2-GM

304 Stainless Steel Basin

D375mm x H90mm

● BAPRND

304 Stainless Steel Basin Matt Black

D375mm x H90mm

● BAPRND-B

Toilets

Designed and engineered for ease of use, durability and style, this range of toilets offer total appeal, with an elegant design and a sleek finish.

Park Avenue Wall Faced Back
Inlet Rimless Pan With Thick
Soft Closed Seat LT-1003D-R

RIMLESS
TECHNOLOGY

Park Avenue Universal Rimless Suite LT-2125A

Universal Inlet Rimless Wall Faced Pan, 4.5L Dual Flush, Extra Height of 460mm Pan (including Seat), Supplied with Soft Closed Seat, Universal Connector for S or P Trap Connections and Floor Bracket. WELS 4 Star Rating.

RIMLESS
TECHNOLOGY

Park Avenue Wall Faced Back Inlet Rimless Pan with Thick Soft Closed Seat LT-1003D-R

Supplied with Universal Fittings for S or P Trap. WELS 4 Star Rating.

RIMLESS
TECHNOLOGY

Poco Rimless Universal Toilet Suite 371380

Wall Faced Rimless Pan, 4.5/3 Litre Dual Flush Cistern, Supplied with Closed Seat, Universal Trap for S&P, Connections and Floor Bracket. WELS 4 Star Rating. WELS #LO7159

RIMLESS
TECHNOLOGY

NEW

Vela Rimless Universal Wall Faced Toilet Suite

371390

Wall Faced Rimless Pan, 4.5/3 Litre Dual Flush Cistern, Supplied with Soft Closed Seat, Universal Trap for S&P, Connections and Floor Bracket. WELS 4 Star Rating.

RIMLESS
TECHNOLOGY

Burlington Traditional Wall Faced Rimless Back Toilet Suite 371455

Wall Faced Rimless Pan, 4.5/3 Litre Dual Flush Cistern, Supplied with Thick Soft Closed Seat, Universal Trap for S or P Trap Connection and Floor Bracket. WELS 4 Star Rating.

Finish Process

Galvanic:

The first step of the galvanic process ensures the tapware componentry is cleaned to remove all the grease, dirt and dust from the surface. This is done by a process of degreasing. Firstly, it is done by hand, then in an automatize chain at 80° C as well as 50°C and then with sodium in room temperature. This process takes 20 to 25 minutes. Second step is applying of a layer of Nickel. This allows the final layer of finishing to be completely attached to the components and it also avoids the risk of oxidation of the surface. In our finishing process we use Nickel PWP, which releases less nickel than the standard one. The result is components with better quality and the tapware treated with this process won't release any toxic substances when water flows into it. The thickness of the nickel layer has an average of 15 micron. The components are now washed again then sent to the final bath for plating. The plating process gives a hard finish surface which passes a standard salt spray test to ensure there isn't any oxidation.

Powder Coated:

Powder coating is a finishing process in which a coating is applied electrostatically to a surface as a free-floating, dry powder before heat is used to finalise the coating. Powder coating is a finishing process that yields a thick hard finish that is tougher than conventional paint. The process of powder coating starts with the preparation of the tapware to be powder coating. Firstly, the tapware is cleaned to ensure the removal of any debris and oil which can inhibit the attachment of the dry powder. Next, the dry powder is applied electrostatically – a process by which the particles of the powder and the object are charged through a high voltage electrostatic surge. This electrostatic stage of powder coating greatly increases the efficiency and productivity of the coating process as less paint is wasted and the metal object is fully coated.

The sprayed powder coating is then cured at temperatures as high as 400 degrees for ten minutes so that the finish can set onto the object. While setting, the powder melts and flows around the object. The heat not only melts the powder but binds the polymer into a heavier polymer that bonds in a tight network-like finish. The curing not only coats the sheet metal product but it also binds the polymer into a tighter heavier finish. The benefits of the process of powder coating are numerous. Due to the dense finish on the tapware, it ensures it is more durable and longer lasting than conventional painting. Secondly powder coating is a thick one coat finish so the process is quite easy. Also, powder coating creates even surfaces.

PVD:

PVD is a coating technology used to deposit a thin film (few microns) on tapware. PVD stands for “Physical Vapor Deposition”. The finishing process begins inside a vacuum chamber, where different metals like titanium, zirconium and chrome evaporate in a vacuum atmosphere. Due to kinetic energy and a potential difference, ions move on the products surface where they condense creating the desired coating. PVD coating is particularly recommended for tapware as it allows hardness and is resistance to abrasions, scratches and corrosion. Typically processed with a thin layer, PVD coating offers exceptional aesthetic features as well as guarantees a very long life for the durability.

Finish Process

Finish	Suffix	Process
Black	B	Powder Coated
Brushed Brass	BB	PVD
Brushed Nickel	BN	PVD
Chrome	C	Galvanic
Gun Metal	GM	Galvanic

Abey Australia offers a complete design solution with our custom kitchen and tapware collection finishes. Each of our special finishes have been developed using state of the art technology processes that result in exceptional surface quality and a unique design element.

Best of all our finishes are done as part of the production process which ensures consistency and stock being readily available in our warehouses.
